BRONZE Y-PATTERN CHECK VALVE

T/S-453

Heavy-duty, full-pattern bronze construction resists pipeline stresses and distortion

Y-pattern body permits exceptional flow rates, typically required in commercial applications

Ideal for steam installations

Large, integral seat and disc are tilted inward at 45 degrees to minimize pressure drop

Uni-directional flow: Can be installed in the horizontal (assembly cap upright) or vertical (upward flow only) positions

Forged brass hinge pin assures smooth, non-binding disc operation.

Available in female pipe threaded sizes: 1/2" to 2"
female sweat tubing sizes: 1/2" to 2"

Working Pressure, Non-Shock (PSI)

Cold working pressure (CWP): 300

Saturated steam (WSP): 150
